HOW TO SECURE

income tax question will probably be discussed at some length in the Senate. Two propositions will be offered, one from the Democratic side, by Senator Bailey, carrying a tax of 3 per cent. on incomes of \$5,000 or more, and the second from the so-called progressive Republicans, by Senator Cummins of Jowa, levying a graduated tax which will go below the \$5,000 mark, and will exempt the income of corpora-Senator Bailey's bill does not exempt the corporations; instead, it

tariff bill will yield a sufficient reve-advance. As yet there are no overex-pand as Senator Aldrich has innue, and as Senator Aldrich has inquired as to the amount of revenue the Bayley bill might produce, it may be inferred that the question of income tax imposition will be very seriously considered by the Republican leaders. The abandonment of the proposed inheritance tax and of the tariff duties on "the breakfast table" - tea, coffee and cocoa-has made a resort to some kind of direct tax a virtual necessity. One proposition which will appear from the Democratic side, will be a Stamp tax on stock transfers, or "a tax on futures." This stands some chance of adoption, now that the wheat corner has, by increasing heavily the cost of flour, illustrated the very unfavorable effects of dealings in fu-

But it may be that the Senate, in stead of adopting either of the direct tax propositions, will decide to impose tariff duties on hides, coal, steel rails, lumber, etc., as a means of raising a ient revenue. It may be remembered that the Senate bill left these articles untouched, relegating action upon them to the Senate itself. The effect of levying duties upon these articles would be to shift the burden of inclined to believe that this shift will be made, for the Senate is, as the Courant lately said, no stranger to sympathy with trusts, many of its members would be hard hit by an income tax, and some of its members have in the past been accused of speculation in "futures."

Mr. Bryan does not desire to become a candidate for the Senate, he says. but will, if sufficiently entreated. He would undoubtedly be a valuable member of that body; it would also afford an opportunity to push, perhaps with effect, the various policies with which his name is identified.

New York city which furnishes the largest market for asphalt, is asking for repeal of the tariff duties of \$1.50 a ton on crude, and \$3 a ton on refined, asphalt. Most cities which have Broke Out on Hips and Legs-Was what is miscalled permanent paving, are interested in this matter, either in the way of new construction or of repairs. But as a matter of fact, outside of New York city, asphalt paving is not so popular as it was a few years ago, while in repairs of asphalt pavement, brick is being used considerably and with apparently superior

If it proves true that British, German and American subjects have been killed or wounded in Asiatic Turkey, during the troubles incidental to Cabinet changes at Constantinople, there may be serious complications with the interested powers. Germany has for some time been regarded as the chief, perhaps the only, protector of Turkey, but is nevertheless not likely to condone attacks upon its subjects. Great Britain has war vessels under orders to proceed to a commanding position. What this country will do, remains uncertain. It is a troubled situationthe Turkish government has evidently lost control of both its army and its

The permanent office-seeking class at Washington which visit their states only to vote at important elections have succeeded in securing the excision from the census bill, of the provision requiring, for appointment to the census service, of an actual domicile in their respective States for one year previous to appointment. This class evidently possesses a potent influence at Washington, and for no better reason than that their votes might prove to be balances of power in their respective States. That such a class of men exists, is a reflection upon American intelligence; they practically confess inability to make a living otherwise than on Federal "pap."

Automobile users and manufacturers have agreed with the legislative leaders at Albany upon automobile legislation. Machines are to be registered, at the rates of \$4 for each car of

under 20 horse-power, \$6 for cars of THE AUTOMOBILE WORLD from 20 to under 30 horse-power, and \$10 on cars of 30 horse-power and over, and chauffeurs are to pay license fees of \$10 for the first year, and \$5 thereafter. Speed limitations are abolished, but operators are required to drive "in a careful and prudent manner and lory at a rate of speed so as not to endanger the property of another or the life or limb of any person." This is more liberal than the Connecticut law which in effect, declares any speed exceeding 25 miles an hour to endanger life and

property. Penalties under the proposed New York law range from a fine not exceeding \$50 for the first offence and a fine not exceeding \$50 or imprisonment for not exceeding thirty days, or both, for a second offence, to a fine not exceeding \$50 and imprisonment not exceeding thirty days for a third or subsequent offence.

"Joy riding" and tampering with automobiles are punishable by "a fine not exceeding \$100, or imprisonment of not more than six months, or the suspension of the right to operate a motor vehicle as a registered chauffcur for not more than six months, or all of such penalties."

An important provision is that the registration fees imposed shall be in lieu of all of the taxes, general or local, to which motor vehicles might be subject as personal property. This is only right, for the imposition of general or local taxes in addition to the registration fees would be, in effect, had each produced successful models double taxation.

The speed provision is construed to permit road races, when sufficient precautions against danger to life and property are taken.

The proposed law seems to be liberal in most of its provisions, but its penalties are somewhat severe, though not more so than existing conditions demand.

Banker Clews is exceptionally optimistic as to the stock market. He says: The outlook suggests increasing ac-tivity with tendency to still higher prices, especially for the cliqued-backcontemplates a much greater revenue ed properties and sound dividend payers accompanied by frequent reactions. There has been considerable realizing, and the disposition appears to be to take profits on every sharp tive situation is sounder than usual Easy money, which, as already said, is a powerful factor in the situation, promises to continue until the demand for crops begins at the summer's end. All things considered the future may be regarded as clearer and more encouraging than at any time since the

> Mr. F. G. Fritts, Oneonta, N. Y., writes: "My little girl was greatly benefitted by taking Foley's Orino Laxative, and I think it is the best remedy for constipation and liver trouble." Foley's Orino Laxative is best for women and children, as it is mild. pleasant and effective, and is a splen-did medicine, as it cleanses the system and clears the complexion. F. B. Brill, local agent.

News of Approaching

Regent Hugh M. Robinson of Seaside Regent Hugh M. Robinson of Seaside Council, Royal Arcanum and Thomas M. Cullinan, of Gilmore Council, have been made chairman and vice chair-man respectively of the reception com-mittee to receive the guests at the banquet to be given in connection with the 23rd annual convention Tuesday, at the

AUCTION OF RESTAURANT securing a sufficient revenue, from at 2:30 p. m. to-morrow of Youngs' the principal roads of England will be taxes upon incomes and "futures" to Everything new and clean and you can fined tax or some bituminous combuy glassware, china, linen, sideboards, eelctric fixtures, mirrors dining tables, draperies, silverware, show cases, counters, hat racks, wall racks, gas broil-ers, kitchen utensils, 1 large range costing \$350.00. 1 electric lamp that cost \$50.00, electric signs that cost \$150.00, marble top cabinet, ice cooler costing \$25, and 8 doz., chairs. Besides these items many other useful and orthese items many other useful and or-namental articles will be sold and re-member they all go to the highest bidder as they must be sold by H. H. Jackson rain or shine. Ladies are invited to come.

ABSOLUTE CURE OF SKIN ERUPTION

So Sore, Irritating and Painful that Little Sufferer Could Not Sleep - Scratched Constantly and Kept Growing Worse.

CUTICURA'S EFFECT QUICK AND PERMANENT

'(When about two and a haif years old my daughter broke out on her hips and the upper parts of her legs with a very irritating and painful eruption. It began in October; the first I noticed was a little red surface and a constant desire on her part to scratch her limbs. She could not sleep and the eruptions got sore, and yellow water came out of them. I had two doctors treat her, but she grew worse under their treatment. Then I bought the Cuticura Soap, Cuticura Ointment and Cuticura Resolvent, and only used them two weeks when she was entirely well. This was in February. She has never had another rough place on her skin, and she is now fourteen years old. I used only half the bottle of Cuticura Resolvent and less than a box of Cuticura Ointment. Mrs. R. R. Whitaker, Winchester, Tenn., Sept. 22, 1908."

WOMEN

Everywhere Use Cuticura Soap and Cuticura Ointment

For preserving, purifying and beautifying the skin, for cleansing the scalp of crusts, scales and dandruff, for dry, thin and falling hair, for softening, whitening and soothing red, rough and sore hands, for annoving irritations and ulcerative weaknesses, and for many sanative, antiseptic purposes as well as for all the uses of the toilet, bath and nursery. Guaranteed absolutely pure and may be used from the hour of birth.

Complete External and Internal Treatment for every Humor of Infanta, Children and Adults con-late of Cuticura Soap (25c.) to Cleanse the Skin, buticura Ontorient (50c.), (or in the form of Chocolate outed Pills 25c. per visi of 60) to Purify the Blood, old throughout the world. Potter Drug & Chem. hopp. Sole Props. Boston, Mass.

Thirteen thousand hides are being used for upholstering and trimming the automobiles turned out this year by a leading American motor car fac-

automobiles on public roads, according to a ruling by an Alderman at Wilkesbarre, Pa.

Mrs. Taft is rapidly becoming expert in handling the runabout which the President gave her and bids fair to be

one of the most enthusiastic drivers in the capital. The Michigan Supreme court has made an important legal precedent by holding that motor cycles come within the meaning of the law relative to mo-

tor vehicles generally. The new speedway from Salt Lake City to Saltair, a distance of about 1 miles, is expected to be completed about May 30. It will be entirely free from curves and angles and when com-

pleted will cost approximately \$85,000. "Joy riding" will be a hardy business in many States this summer, when the laws passed by various Legislatures making it a penal offence go into effect. In New Jersey, for instance, "joy riding" is now punishable by three

years in prison. Napthalene is a white substance o very little use. It is a by-product of the destructive distillation of coal as practiced by the gas companies. As such, it was thrown away, until three years ago, when a use was found to

pay for saving it. A Frenchman named Cugnot built and operated a successful steam automobile as early as 1762, and twenty-five years later William Symington in England and Oliver Evans in America

Vases for flowers have for some time been an adjunct of the closed automobile. Now some smart broughams have a vase for flowers beside each door. The hanging vases of Japanese porcelain are the favorites, though the metal cases into which a vase slips are

As for ordinary purposes a single metal studded tire on one of the rear wheels is sufficient to give reasonable security against skidding. It has been suggested that in the case of those use removable rims or spa s the spare tire should have studded shoe, ready for a change if

necessary.

A minister of Los Angeles, Cal., has been giving special sermons to auto-mobilists. He has used a registered list of owners for sending out the invitations, and employed the text: "The driving is like the driving of Jehu, for ne driveth furiously."

The new automobile act of Minnesota s expected to add from \$150,000 \$200,000 to the good roads fund of the State. It provides a tax of \$1 a horsepower in lieu of all personal taxes on machines, and was supported by all 19 clubs affiliated in the State Motor As-

Cylinders with cracks are sometimes brazed, but, owing to it being neces-sary to heat the whole cylinder to a good red heat to even up the contrac-tion strains, so as not to crack when cooling, the bore of the cylinder is gen-erally warped, the job requiring a lot of finishing as the spelter and flux preads considerably and is hard to

It is expected that the big engine plant, projected by a leading automobile company, for Flint, Mich., will be completed by October 1, next. The building will be 1,021 feet in length by 365 feet in width, and will be devoted exclusively, to the manufacture of mo-Arcanum Convention employ in the neighborhood of 3,000

> Springs too weak to hold the valves or the cams will make the engine weak at high speeds, and will produce clat-tering owing to the belated seating of the valves. If the springs are too stiff and are shortened, the cut ends must be turned flat which necessitates heat-ing them in a fire and afterwards re-

tempering. Sir Herbert Praed, an eminent authority, has given it out as his conviction that within a year or two, all the principal roads of England will be pound with the happiest results allke to the users of the roads, those who live near them and those who have to

pay for them.

New Jersey legislators are still laughing over the odd plight of Assemblyman Colgate, who was discovered to be man Colgate, who was discovered to be wearing bandages due to an automo-bile accident, while arguing for the more liberal motor bills, of which he was the author. While driving with was the author. While driving with Governor Fort, Colgate's car struck a boulder in the road, throwing the As-

semblyman against the front seat.

Disappointment is felt in some quarters because the reports of the expedition of Lieutenant Shackleton, who got within about 100 miles of the South Pole recently, contained nothing about the motor-sledge which he had taken along. Shackleton was confident the sledge would be of material assistance sledge would be of material assistance. sledge would be of material assistance to him, but apparently, whether be-cause of the nature of the country to

be traversed or otherwise, is not yet known, it failed to prove useful. Competition by amateur drivers in the transcontinental race, will be made possible by the establishment of gaso-line and oil supply stations all along the route, so that drivers may secure supplies of fuel and lubricant without going to the expense of providing sup-plies of their own. The oil will be fur-nished free of cost by a prominent oil company, and gasoline supplied at not

more than 15 cents a gallon.

An excellent opportunity will be afforded by the ocean to ocean race from New York to Seattle, starting June 1. to compare the merits of solid tires with pneumatic for long distance rac-ing or touring. One of the cars en-tered will be equipped with solid tires, and the vibration will be taken up by a specially devised equalizing lever suspension. The device is a horizontal lever working against a vertical spring, and the levers will be fitted to both

front and rear axles. A repair shop on a motor car has been put on the road by a firm at Oak land, Cal. A forty horse-power auto-mobile has been equipped with a plat-form and enclosed body. In the car is a lathe, two grinding and polishing wheels, emery wheel, key cutting ma chine, glass rack, tool cabinets an benches, complete plumber's outfit, and the machinery is run by a hree horse-rower motorcycle engine. The com-pany claims to repair anything from a

stew pan to an airship."

Acetylene requires about 121-2 parts of atmospheric air to one of acetylene for complete combustion, and it follows that every provision must be made to afford the requisite quantity of air if it is desired to prevent the burner from clogging and if the light is to be steady and bright, which is an absolutely es-sential incidental of the process from

the economic point of view. Nothing but Federal licenses will ever fully protect the chauffeur and public against reckless and incompe-

colds and lung trouble. Do not be plastered on under side with hard fooled into accepting "own make" or other substitutes. The genuine contains no harmful drugs and is in a yellow package. F. B. Brill, local agent.

All stairs in tenement houses shall be plastered on under side with hard plaster on metal lath.

Dated April 16, 1909.

Adopted unanimously.

RESOLUTIONS

Building Construction Resolved. That on, and after this date, all buildings designed to have front, and rear, tenements, shall have the rear tenement constructed of in-combustible materials, the same to be approved by the Board of "Building Commissioners" and in all buildings other than brick, all interior stair cases that accommodate two or more tenements of the same floor shall have the surrounding walls enclosing public against reckless and incompetent driving, according to Wm. F. Walters, president of the Professional Chauffeurs' Club of America. In the seven and a half years' existence of the club only one of its members has figured in a fatal accident, and in that instance the chauffeur himself was the victim. Mr. Walters believes that the greed of the separate States for motor license revenue is productive of many incompetent drivers and resultant accidents.

Cases that accommodate two or more tenements of the same floor shall have the surrounding walls enclosing said stair cases constructed of incombustible materials, the same to be approved by the Building Commissioners, and no tenement shall have more than one door from said stairway on each floor. Doors, jambs, and casings, to be fireproof, glass to be wired glass, and in all buildings designed for store with tenements and stair cases constructed of incombustible materials, the same to be approved by the Building Commissioners, and no tenement shall have more than one door from said stairway on each floor. Doors, jambs, and casings, to be fireproof, glass to be wired glass, and in all buildings designed for store with tenements of the same floor shall have the surrounding walls enclosing said stair cases constructed of incombustible materials, the same to be approved by the Building Commissioners, and no tenement shall have more than one door from said stairway on each floor. Doors, jambs, and casings, to be fireproof, glass to be wired glass, and in all buildings designed for store with tenements of the same floor shall have the surrounding walls enclosing said stair cases constructed of incombustible materials, the same to the approved by the Building Commissioners, and no tenement shall have more than one door from said stairway on each floor. be wired glass, and in all buildings designed for store with tenements above, the stairs passing through stores shall be enclosed with incomcan be persuaded into taking anything but Foley's Honey and Tar for coughs, colds and lung trouble.

Do not be small be enclosed with incombustible partitions, to be approved by the Board of Building Commissioners, All stairs in tenement houses chall be colded by the Board of Building Commissioners, and the stairs in tenement houses chall be colded by the board of Building Commissioners, and the stairs in tenement houses chall be colded by the Board of Building Commissioners, and the stairs in tenement houses chall be colded by the business of the stairs in tenement houses chall be colded by the stair by the stairs in tenement houses chall by the stairs in tenement houses chall be colded by the stair by t
